# Scheme of Approved Industrial Parks

West Bengal offers you the opportunity to set up industrial parks where you can reduce costs through economies of scale and create high growth regions. The State Government will actively facilitate the setting up of the park, extend many benefits and create the right business environment for you to run the parks.

## **Set up industrial parks in West Bengal with support from the State Government**

The West Bengal Government has launched the Scheme of Approved Industrial Park (SAIP) to ensure that adequate land, free from all encumbrances, is available to an entrepreneur who proposes to set up an MSME unit in the state.

Under this scheme, a private entity who has arranged/procured land in agreement with the relevant policies of the State, can set up an industrial park under an SPV anywhere in West Bengal. The SPV will be free to provide land, buildings, or installations to companies wanting to set up industries in the park. All allotments of plots/sheds/spaces to units in an AIP should be made only to MSMEs. A minimum of 20 acres of land is required for each park.
